To Mansi, cyber security is a field where you can be a superhero. But when you're a modern-day tech protector facing millions of malware threats, you need backup. That is why she is drawn to the space where cyber security meets machine learning. Mansi wants to help shape how

we meet the growing magnitude of cyber threats through data and automation. This challenge energizes her – the same way she is energized by the challenge of being one of the few women in the field, even though it is sometimes difficult. She knows that what she achieves can have a ripple effect and inspire others.
